THE BIOTEC ITALIA EXPERIENCE FOR THE BEAUTY OF FACE AND BODY

COSMECEUTICAL SKIN PRODUCTS

From Biotec Italia research comes the Renlive line. Renlive products are innovative and natural and are specifically formulated to treat and effectively resolve skin problems. Above all, Renlive means paying special attention to the choice of raw materials, which are subjected to countless purity and effectiveness tests. All Renlive products are hypoallergenic and respect skin physiology and represent the latest frontier in derma-cosmetology: safe in use, dermatologically tested, free of sensitising or harmful substances such as mineral oils, petroleum derivatives, silicones, vaseline and paraffins.

NATURAL WELLBEING AND BEAUTY

What is the secret of Renlive quality?

The use of dermofunctional and plant-derived active ingredients, all with very high concentrations.

In this way, Renlive guarantees maximum effectiveness of the cosmetic for immediate and lasting results.

The Renlive cosmeceutical line is the result of direct collaboration between dermatologists, chemists and cosmetologists, following the latest research on skin biology and physiology.

THE BIOTEC ITALIA EXPERIENCE FOR THE BEAUTY OF FACE AND BODY

SAFE INGREDIENTS AND FOCUS ON QUALITY

Renlive cosmeticeuticals are produced on the spot and packaged in small batches. Thus, freshness and safety of the ingredients are ensured. In addition, all Renlive cosmeceuticals are produced in a sterile environment, and the finished products are enclosed in deformable containers, such as the tube and soft bottle. Thus, the formulation is protected from contamination by external agents and preservatives are kept to a minimum. The research, development and production of the Renlive range are carried out according to the UNI EN ISO 9001 standards.

OUR LINES

FLOUR⁴

The Fluor4 line captures the evolution of skin oxygenation. The presence of perfluorocarbon allows the skin to breathe at optimal levels and to regulate itself better in polluted environments..

RIGENERA

An innovative line aimed at preventing and correcting age-related blemishes.

DRY SENSITIVE

Formulated with active ingredients with a calming and soothing action, capable of educating sensitive skin to be less reactive and thus more resistant to external aggression and environmental pollution.

COMBINATION OILY

Combination Oily is a comprehensive range designed to treat oily and impure skin.

FLOUR⁴

The Fluor4 line captures the evolution of skin oxygenation. The presence of perfluorocarbon allows the skin to breathe at optimal levels and to regulate itself better in polluted environments. Improving the vitality of the skin is achieved by increasing oxygen levels.

BENEFITS OF PERFLUOROCARBON

FREE RADICALS:

It increases the skin's energy supply, improves cellular interaction and supports the structural reconstruction of skin tissue.

ACNE:

Reduces irritation and inflammation, preventing the reappearance of acne, opening the pores so that they can breathe and improving the renewal of the skin cells.

RECOVERY OF LESIONS:

High levels of oxygen and other ingredients regenerate and improve the skin.

AGEING AND WRINKLES:

Moisture levels in the skin are increased by more than 40% in just a few weeks of treatment, and the depth of the wrinkles is diminished.

Fluor⁴

OXYGENATION MOUSSE CLEANSE

Innovative mousse cleanser solution with perfluorocarbon and plant extracts for balanced cleansing without a rebound effect.
